Major Activities

The IFLA KM Section engages in activities to increase conversation between its members and others interested in the global aspects of knowledge management. This includes knowledge sharing strategies, processes and practices of organizations, and the implementation of KM culture in libraries and information environments. Annually, activities are likely to include: open sessions (alone or in cooperation with other Sections), Satellite conferences prior to IFLA WLIC, Knowledge Café, publications, a semi-annual Newsletter, multilingual brochures and advocacy papers. The KM Section sponsors the Digital Humanities / Digital Scholarship Special Interest Group.

The IFLA KM Section provides an international platform for professional communication and understanding of the significance of KM for libraries, following the developments in KM and promoting its practical implementation within the IFLA community. In other words, the IFLA KM Section aims to be “The Voice of Global KM” in the international information community.
